

Keep your scanners running in peak condition with Preventative Maintenance

Your scanner is an essential part of your document workflow. With many businesses utilizing OCR, ICR, and barcode technologies, regular maintenance is crucial to ensure that your scanner is creating high-quality images. Hopefully your scanner will never need repair, but regular tune-ups will reduce that risk and keep your images sharp and crisp.

Already have
a contract?

In busy offices doing production scanning, a service contract may not provide any or enough PM visits to properly maintain your equipment. Our customizable PM program is a perfect addition to your existing contract.

Don't have a
contract?

Even if you don't have a service contract, regular PM visits can greatly reduce your need for costly time and material repairs while improving your image quality. We all know that downtime can be a nightmare, so reduce your risk and improve your performance with Preventative Maintenance.

The IMS Preventative Maintenance Program Advantage

Cost-effective support

Reduce downtime and costly repairs

Improved Quality & Performance
