## On-Premises or Cloud-based Content Management

PSIsafe is a complete document management software and business process automation solution.

Business in the 21st century is a 24/7/365 proposition. For an organization to be efficient, nimble and agile, managers and employees must be able to work with mission-critical data anywhere; at home or on the road, at their desk or on vacation. And traditional filing systems – paper documents, shared drives, personal hard drives – are rife with hassles, headaches, risks and expense. PSIsafe offers a centralized repository where all documents are accessed and managed, eliminating the inefficiencies of filing cabinets, shared drives and local hard drives.

- ▶ Streamlines overflowing paperwork
- ▶ Effortless implementation & ease of use
- ▶ Unparalleled tech support
- ▶ Granular security features

PSIsafe can be deployed on-premise or hosted in our secure, private cloud. Either version is configured with each installation, creating a tailored solution for any organization. It's your office, your workflows, your processes and your culture.

Capture documents from direct-connect scanners, import from network folders, existing databases or fax servers. Harness PSICapture's architecture for interactive or automated processing.

PSIsafe's flexible workflows route documents based on your business rules with complete audit trail and document tracking to automate and expedite any process.

# PSI|safe

Documents are securely stored in On-Premise or Cloud deployments of PSIsafe. Integrations with your HRIS, accounting, CRM and other systems help to maximize your investment.

# Effortless Content Management with PSIsafe

## ▶ Content Records Management

PSIsafe goes a step beyond CRM solutions, allowing organizations of all sizes to effortlessly store and access all of their customer records in a secure environment.

## ▶ Mobile Document Management

Access client information during an off-site meeting or collect a legal signature from your phone or tablet.

## ▶ Windows Document Retrieval

Make the mission-critical documents stored in PSIsafe accessible in nearly all Windows-based enterprise applications without losing security, audit trails and version controls.

## ▶ Third-Party Integration

PSIsafe's open API gives clients, partners and OEMs the ability to safely and confidently integrate third-party applications to create firm-wide interoperable document management workflows.

Competitively priced, truly scalable and uniquely versatile, PSIsafe is the ideal content management solution for any organization. Contact our Sales team today!

## About PSIGEN Software, Inc.

PSIGEN Software, Inc. is an innovative leader of advanced document capture, workflow and content management solutions. We are dedicated to helping companies automate document processing.

PSIGEN's solutions integrate with most any type of scanning device, fax server, MFP device, network folder, or WebDAV folder. The lasting result is a more productive end user, using fewer mouse clicks and keystrokes, while accomplishing complex, powerful, integrated modular content management and workflows.

These solutions can move data and documents to and/or from more than 60 supported third-party content management systems in addition to PSIGEN's own PSIsafe document management and workflow system.
